Introduction

These release notes are for the BluOS Integration Utility. This utility is a standalone program that configures BluOS players to integrate with 3rd party control devices.

Dependencies

- BluOS Integration Utility runs on Windows 10 and macOS 10.13 or higher.
- Players require BluOS v4.2.10 or higher.
- Lutron is supported on Telnet Protocol, and on LEAP Protocol: Caseta, RA2 Select, HomeWorks QSX, and RA3.
- Bluesound Professional is supported on the CP100.

Change Log

Version 1.8.1 (released April 23, 2024):
